

uni file cabinet 780

Get the big picture: the Unikorpus 780 prefers to stand alone in the room and stores large plans, sketches, drawings and all other office equipment. Thanks to three different drawer sizes, the Unikorpus 780 can be set up flexibly and as required.

Just like its little brother, it is available in natural anodised aluminium or powder-coated in dark bronze or black and can be fitted with levelling feet or castors.

An efficient and attractive organiser.
